5th Numble Jumble Vocabulary ~ Student List

Number	Words	Definitions	
Science - Ecosystems			
1	carnivore	A consumer which gets energy from eating animals (meat)	
2	omnivore	A consumer which gets energy from eating plants and animals	
3	herbivore	A consumer which gets energy from eating plants or vegetation	
4	decomposer	An organism that gets energy from recycling nutrients by breaking down decaying material.	
5	producer	An organism that makes its own food by the process of photosynthesis.	
6	photosynthesis	A chemical process by which plants use sunlight to create their own food.	
7	consumer	An organism that gets its energy by eating other organisms.	
8	biome	Areas that have similar climate and land features with specific types of plant and animal life.	
9	organism	A living thing	
10	abiotic	Non-living things such as light, air, and soil	
11	biotic	Living things in an ecosystem, such as animals and plants.	
12	terrestrial	Having to do with land (such as forest and grassland)	
13	aquatic	Having to do with water	
14	oxygen	Gas produced by plants that is needed for respiration by animals	
15	carbon dioxide	Gas produced by animals that is needed for respiration by plants	
16	adaptation	A change in order to be successful in a new environment	
17	algae	An aquatic producer that is responsible for 70% of the earth's oxygen	
18	ecosystem	All living and nonliving things found together in an environment	
19	environment	Everything that surrounds an organism and influences it	
20	food web	A model that shows how several food chains connect together.	

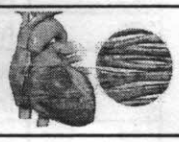

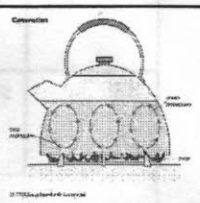

Revised 9/3/2021

5th Numble Jumble Vocabulary ~ Student List

21	food chain	A simple path that shows how energy moves from one organism to the next.	
22	transfer of energy	How energy moves from one source to another	
23	estuary	An aquatic ecosystem where saltwater and freshwater mix	
24	fertile	Rich in nutrients (ex. Grasslands, Estuary)	
25	niche	Specific role based on traits that allow for competing organisms to live in an ecosystem.	
26	pollutant	Harmful substance that has negative effects on an ecosystem	
27	population	A group of the same type of organisms living in one area	
28	Community	All of the populations in an area	
Science - Living Organisms			
29	traits	Quality or characteristic of a living thing	
30	acquired traits	A trait that a living thing gets during its lifetime	
31	instinct	An inherited behavioral trait such as hibernating and migrating	
32	heredity	The process by which traits are transferred from parent to offspring	
33	DNA	The material that carries all the information about how a living thing will look and function	
34	inherited trait	A characteristic that a living thing gets from its parents	
35	offspring	The young of a person, animal, or plant	
36	cells	The basic unit of life	
37	unicellular	A living organism composed of one cell (amoeba, paramecium)	
38	multi-cellular	A living organism composed of many specialized cells (hydra, insect, worm, animal, human)	
39	tissue	A group of similar cells that work together (muscle cells, skin cells)	

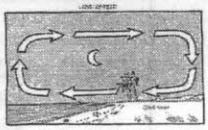

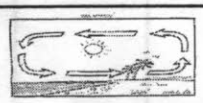

Revised 9/3/2021

5th Numble Jumble Vocabulary ~ Student List

40	organ	Part of a system that consists of tissue that is specialized to perform a specific task (heart, brain)	
41	nervous system	sends and receives messages through the body (brain, nerves, and spinal cord)	
42	circulatory system	moves oxygen and nutrients in the blood throughout the body while removing carbon dioxide(heart, blood vessels) *also called cardiovascular system*	
43	respiratory system	Brings oxygen in and takes carbon dioxide out (lungs)	
44	digestive system	Breaks down food to be used as energy(stomach, intestines)	
45	skeletal system	Provides support and structure and protection of organs (bones)	
46	muscular system	Works with bones to allow movement (muscles)	
47	skeletal muscle	Muscles attached to bone	
48	smooth muscle	Muscles of the internal organs (stomach)	
49	cardiac muscle	Muscles of the heart	
50	involuntary muscle	Muscles that work automatically (cardiac muscle, stomach muscle)	
51	voluntary muscle	Muscle movement that you can control (lifting your arm)	
52	Locomotion	The ability to move	
		Science - Weather Systems	
53	weather	Condition of the atmosphere at a specific place and time	
54	convection	Transfer of heat energy through liquids and gases; hot air/water rises and cool air falls in a circular motion	
55	radiation	Transfer of heat energy through waves (i.e. the sun's rays)	
56	climate	Average weather of an area over a period of time	
57	meteorologist	A scientist that studies weather	
58	conduction	Transfer of heat between objects that are touching	
59	evaporation	A change from a liquid to a gas	
60	water cycle	The movement of water between earth's surface and the atmosphere	
61	transpiration	A plant's release of water vapor into the air	
62	condensation	The change from a gas to a liquid	
63	precipitation	The falling to earth of any form of water (Rain, snow, sleet, hail)	

Revised 9/3/2021

5th Numble Jumble Vocabulary ~ Student List

64	run-off	Excess water that the ground cannot absorb and flows over the land	
65	air mass	A large body of air with similar temperature and humidity	
66	front	The boundary between two different air masses (cold or warm)	
67	prevailing wind	A wind pattern that blows consistently in the same direction (In the United States it is from West to East)	
68	jet stream	Air current in the upper atmosphere that goes from West to East	
69	current	A mass of water or air that moves in a specific direction (example: gulf stream)	
70	latitude	The distance North or South of the equator	
71	equator	The imaginary line that divides Northern and Southern Hemispheres (0° latitude)	
72	Elevation	Height of earth's surface above sea level	
73	Altitude	Vertical distance between an object and the earth	
74	humidity	The amount of water vapor in the air	
75	low pressure	A mass of warm moist air (brings stormy weather)	
76	high pressure	A mass of cool dry air (brings fair weather)	
77	weather instruments	Tools that help measure and predict weather conditions (barometer, anemometer, thermometer, etc.)	
78	stratus	Low-level layer clouds	
79	cumulus	Mid-level puffy clouds	
80	nimbus	Rain clouds	
81	cirrus	High level wispy clouds	
82	land breeze	A breeze from land towards water during at night	
83	sea breeze	A breeze from sea towards land during the day	
Science - Force and Motion			
84	force	push or pull on an object	
85	distance	how far an object travels	
86	motion	changing a position over time	
87	speed	how far an object moves in a certain amount of time (distance/time)	
88	acceleration	a change in speed or direction	
89	inertia	a tendency of an object to resist a change in motion	
90	mass	the amount of matter in an object	
91	momentum	the strength of movement	
92	gravity	a force that pulls objects towards each other	
93	friction	the force that resists motion between two touching	

Revised 9/3/2021

5th Numble Jumble Vocabulary ~ Student List

		surfaces, slows things down	
94	air resistance	the force of air pushing against the motion of an object	
95	matter	Anything that has mass and takes up space	
96	density	How tightly packed the molecules are for a given object	
97	physical change	change in size, shape, or state of matter (can be reversed)	
98	chemical change	Changes and forms a new substance (can't be reversed)	
99	temperature	The measure of the average kinetic energy of the particles in an object	
100	kinetic energy	the energy of motion	
101	potential energy	stored energy	
102	thermal energy	heat energy	
Academic Vocabulary			
103	Significance	how important something is	
104	Compare & Contrast	to determine how things are similar and different	
105	Main Idea	what the text is mostly about	
106	Similar	almost the same as something else	
107	Summarize	to briefly state the main points	
108	Summary	a brief statement of the main points	
109	Cause & Effect	the reason an event happens/the result or outcome of that event	
110	Imply	to suggest without directly stating; to hint at something	
111	Relationship	how things are related or connected	
112	Cite	to support an opinion or idea using text evidence	
113	Chronological	a type of text structure where events are organized in time order (biography, schedules, timelines)	
114	Sequential	a type of text structure where events are organized in a step-by-step process using words such as first, next, then, last (recipes, experiments)	
115	Explicit	when something is clear; leaves no doubt	
116	Solution	the answer to a problem	
117	Resolution	the steps leading up to a solution	
118	Symbolize	to represent or stand for	
119	Key Detail	essential information that supports the main idea	
120	Conflict	situation needing to be solved (a problem)	
121	Theme	the life lesson or message that the author wants to teach (usually inferred)	
122	Infer	to determine the answer by using background knowledge + text clues (not stated in the text)	
123	Quote	an exact statement from the text (must use quotation marks)	
124	Specific	exact or precise	
125	Conclude	to form an opinion or make a decision based on evidence	

Revised 9/3/2021

5th Numble Jumble Vocabulary ~ Student List

126	Relevant	closely connected to the topic	
127	Interpret	to look closely and build meaning based on evidence	
128	Clarify	to make a clearer understanding	
129	Classify	to arrange into groups based on attributes	
130	Context Clues	clues from the text that define the meaning of a word	
131	Logical	reasonable thinking based on information	
132	Fact	information that can be proven	
133	Opinion	a personal belief	
Math Vocabulary			
134	Parentheses	Curved symbol to show grouping in math ( )	
135	Brackets	Boxed symbol to show grouping in math	
136	Braces	"Birded mouth" like symbol to show grouping in math	
137	Numerical Expressions	A number sentence that does not have an answer	
138	Ordered Pairs	A pair of numbers used to locate a point on a grid	
139	Coordinate Plane	The grid on which coordinate points are placed	
140	Place Value	The worth of a number based on its position	
141	Patterns	Number arranged in a specific sequence	
142	Comparison	Finding similarities and differences in math	
143	Operations	Addition, subtraction, multiplication and division	
144	Product	The answer to a multiplication equation	
145	Sum	The answer to an addition equation	
146	Quotient	The answer to a division equation	
147	Divisor	Number that you divide the dividend by to get a quotient	
148	Factor	The numbers that are multiplied to give a product	
149	Array	An arrangement of numbers in rows and columns	
150	Fraction	Part of a whole	
151	Equivalent	The same value	
152	Difference	The answer to a subtraction equation	
153	Denominator	The bottom number of a fraction	
154	Numerator	The top number of a fraction	
155	Benchmark Fraction	Reference on a number line when estimating fractions	
156	Estimate	To tell about how much	
157	Reasonable	Logical, makes sense	
158	Mixed Number	Whole number and a fraction	
159	Improper Fractions	A fraction where the numerator is larger than the denominator	
160	Evaluate	To solve a problem	
161	Unit Fraction	A fraction with one as the numerator	
162	Convert	To change to a different measurement	
163	Metric Measurement	Measurement based on the unit 10	
164	Customary	The United States measurement system	

Revised 9/3/2021

5th Numble Jumble Vocabulary ~ Student List

	Measurement		
165	Volume	How much something can hold	
166	Attribute	Characteristics	
167	Solid Figure	A three dimensional figure	
168	Cubic Unit	A unit used to measure volume or capacity	
169	Coordinate	An ordered pair	
170	Axis / Axes	Either the horizontal line (x) or the vertical line (y) that form the baseline of a graph	
171	Horizontal	A line that is parallel to the horizon (----------)	
172	Vertical	A line that is straight up and down	
173	Intersection	Where two lines meet or cross	
174	Origin	The beginning point where the x and y axis meet	
175	Hierarchy	The arrangement or classification of things	
176	Polygon	A closed figure made up of line segments	
177	Parallelogram	A quadrilateral where the opposite sides are parallel and congruent	
178	Rhombus/Rhombi	A parallelogram where all sides are congruent	
179	Quadrilateral	4 sided polygon	
180	Isosceles Triangle	A triangle with at least two congruent sides	
181	Scalene Triangle	A triangle with no congruent sides	
182	Right Triangle	A triangle with one right angle (90 degrees)	
183	Equilateral Triangle	A triangle with all sides congruent	
184	Regular Polygon	A polygon where all the sides are congruent	
185	Represents	To stand for something	
186	Value	How much a number or expression is worth	
187	Dimension	A measurement in one direction (length, width, height, or depth)	
188	Capacity	How much something will hold	
189	Congruent	Even; the same; equivalent	
190	Exponent	A number that tells how many times the base is used as a factor	

Revised 9/3/2021
